There was a farmer up in Vermont whose buildings always presented a most dilapidated appearance. One day a friend asked the owner why he did not at least repair the roof of his barn. The old gent-man hesitated a moment, then said with his characteristic drawl,—"Well, Jim, it's like this; when it's raining, I can't fix the roof, and when it's pleasant the roof doesn't need fixing."

It surely is fortunate that not all of us are like the farmer in the story. Nevertheless, even you and I know how easy it is to say, "Oh, I'll take care of that later"—and then forget. And the worst of it is, so many of the things we neglect are just the ones that would give us a whole lot of benefit and pleasure.

Buy you a home and get the profit that's sure to come on City and Farm property, if you work and fix it up and not put off as the farmer above did. I have a good list of Farm and City property for sale, and I can help you if you want to sell or buy. I also write all kinds of Insurance and Bonds. See me for either.
